

# FREE Bengal Code Day 2018

**When:** Saturday, November 17th 12:30pm—3:30pm

**Who:** Geared for students aged 10 to 14

**What:** Enjoy a fun FREE introduction to use of *Python*.

The goal of our educational event is to offer a hands-on experience for kids to learn basic features of this user-friendly, multi-purpose computer coding language. Students will expand their knowledge of programming and data in an interactive setting with friends.

**Where:** SUNY Buffalo State College, Science + Math Complex 393  
(Parking Lot I-37; off Iroquois Rd, adjacent to Route 198)

**Pre-Registration REQUIRED:** (<https://bit.ly/2zmcZnt>)

Space is Limited to 15 students.

In our modern world, learning to use technology is no longer enough; it is now foundational to learn what goes into building the technology. We are excited to offer a Workshop where young students receive an introduction to the exciting field of Data Science, guided by faculty & graduate students from Buffalo State.

- Coding is the hottest topic in every academic and professional field.
- Python** is the fastest growing programming language in Data Science.
- The best part is that you don't need any experience to learn how to do awesome things in this class.
